

PSC quick-change tool holders BMT 55

Takisawa Taiwan

UX-2000 (BMT55)

Turning made better

PSC turning tool holders are go-to solution for maximizing process efficiency.

Used in both standard turn centers and hybrid mill-turn machines, PSC turning tool holders enable fast tool change solution for reduced down-time and increased productivity without compromise on stability and rigidity. Additionally, direct high pressure coolant nozzles increase tool life with higher feeds and speeds

More time making chips and less time in unwanted stops makes investment in Polygonal taper tool holders a great choice with a fast return.

Key benefits of PSC turning tools:

- Reduced setup and tool change time - maximum utilisation of the machine
- Increased stability and versatility - in vertical lathes, multi-tasking machining centers and machining centers with turning possibilities
- Ultimate repeatability - allowing offline tool presetting
- Reduced tool inventory and storage space in workshop - due to universal interface for both turning and milling
- Self centering system provides high precision and repeatability
- Carbide shims to prevent insert seats from damage
- Quick change, monobloc system without additional interfaces

OD single holder

Right or left single OD quick coupling C4 holder

Turret	Code
BMT55	C4.DVR/L.BMT55

OD double holder

Right or left double OD quick coupling C4 holder

Turret	Code
BMT55	C4.DVR/L.BMT55.D

OD Y holder

Right or left Y-axis OD quick coupling C4 holder

Turret	Code
BMT55	C4.DVR/L.BMT55.Y

OD double Y holder

Right or left double Y-axis OD quick coupling C4 holder

Turret	Code
BMT55	C4.DVR/L.BMT55.DY

ID single holder

Right or left single ID quick coupling C4 holder

Turret	Code
BMT55	C4.DUR/L.BMT55

ID double holder

Right or left double ID quick coupling C4 holder

Turret	Code
BMT55	C4.DUR/L.BMT55.D

ID Y holder

Right or left Y-axis ID quick coupling C4 holder

Turret	Code
BMT55	C4.DUR/L.BMT55.Y

ID X holder

Right or left X-axis ID quick coupling C4 holder

Turret	Code
BMT55	C4.DUR/L.BMT55.X

ID double Y holder

Right or left double Y-axis OD quick coupling C4 holder

Turret	Code
BMT55	C4.DUR/L.BMT55.DY

OD driven holder

OD drilling or milling unit, C4 quick-coupling

Turret
BMT55

Code
C4.DPO.BMT55.E

ID driven holder

ID drilling or milling unit, C4 quick-coupling

Turret
BMT55

Code
C4.DPF.BMT55.E

ID cylindrical shank holder

ID holder for 40mm or 50mm cylindrical shanks

Turret
BMT55

Code
40.DU.BMT55

Cut off holder

Right, central, or left. A = 32mm

Turret
BMT55

Code
32C.DO.BMT55

How to choose correct holder orientation - internal

- | | | |
|-----------------------------|-----------------------------------|---------------------------------|
| L Left-hand adapter | DUL Left-hand tool holder | M04 CCW spindle rotation |
| R Right-hand adapter | DUR Right-hand tool holder | M03 CW spindle rotation |

How to choose correct holder orientation - external

- L** Left-hand adapter
- DVL** Left-hand tool holder
- M04** CCW spindle rotation
- R** Right-hand adapter
- DVR** Right-hand tool holder
- M03** CW spindle rotation

PSC adaptors for turning and milling

In order to provide complete solution for your machine, our turning and rotating PSC product line offers you wide range of tool holders for any application.

- 3 different sizes for turning - C4, C5 and C6
- ISO S, D and P clamping systems
- Standard rotating tool holders - Shrink fit chucks, end mill holders, shell mill holders, collet chucks
- Short adaptors - tool holders without gripper groove for ATC
- Rectangular shank adaptors - radial, axial, and angled
- Boring bar and indexable drills tool holders
